# PEAK FLOW METER

## Smart Asthma

## PRODUCT

### DESCRIPTION

Smart Respiratory Products Ltd, have developed an innovative Peak Flow Meter to measure peak expiratory flow (PEF) by tracking the degree of respiratory conditions in patients with asthma using direct connection via audio jack to a smart phone. The product comes with a free application which can be downloaded using iOS or android software. Once the software has been installed into the patient's smartphone a simple set-up process enables the customer to measure their peak flow. All the measurements are recorded on the smartphone and are 100% accurate.

### Technology

When the Smart Peak flow is connected directly to the smartphone via the audio jack the patient blows into the device. A small turbine rotates, thus producing an electronic signal which is interpreted by the Smart Peak Flow app to record the results. This innovative, affordable, small, portable, and easy to use electronic PEF meter assists in evaluating respiratory.

### PROFILE

The Smart Peak Flow meter offers the patient peace of mind they will be able to accurately measure their peak flow, time after time. The accuracy and repeatability of the device is unparalleled in the industry, compared to conventional peak flow meters. The peak flow data is stored using, easy to read graphics on the smart phone and can easily be shared with their asthma nurse practitioner or Doctor.

- Smart Phone based Peak Flow Meter
- Ergonomic and unique design
- Attractive price
- Smart technology
- Reliable and accurate
- Guaranteed for 2000 blows
- Easy to read graphics
