

POTENSEN FORTE®

A Life Style Power to Revive Gender Identity

PRODUCT DESCRIPTION:

Potensen forte is a synergistic combination of powerful aphrodisiac ingredients yohimbe, Ginseng, and Tribulus Terrestris ensuring an integrative treatment model which addresses the complex interplay of biological and psychological issues involved in sexual behavior.

YOHIMBE:

Potensen forte contains Yohimbe extract, a potent sexual revitalizer which increases the erectile rigidity as well as erectile capacity and will make orgasm more powerful along with erection and increases the force and volume of ejaculation tremendously by postponing the point of ejaculations and by making orgasmic release more strongly. One of the components of Yohimbe named Yohimbine is the only medication approved by FDA for the treatment of impotence before viagra.

GINSENG:

Ginseng is the most famous widely recognized compound used to enhance sexual vigour and vitality, Ginseng promises to be highly effective as well as one of the safest Rejuvenator, biostimulator and sexual revitalizer. Ginseng is the potent Gonadotrophic and increases the output of male Hormones.

Young mice given Ginseng reach puberty faster than untreated mice and possess seminal Vesicles and prostate Glands which were 40 to 60 percent larger than the control. Patients who have suffered from sexual impotence report feeling more tranquil, active and virile after a few days of Ginseng use. The Renaissance Revitalization Center in Nassau notes that impressive results have been achieved in 27 cases of male secondary impotence, complete recovery was reported in 15 cases, partial improvement in 9 and the 3 remaining cases were referred to Psychiatric treatment.

Apart from sexual health Ginseng promises to be highly effective as well as safest Rejuvenator and biostimulator ever tested.

TRIBULUS TERRESTRIS:

Potensen forte contains Tribulus Terrestris a potent non hormonal sexual revitalizer being used by millions of people in various parts of the world, studies have shown a better than 50% increase in testosterone levels when taking the tribulus terrestris.

A significant benefit of tribulus is the stimulation of hormone production to a balanced level, without over stimulating the secretion of hormones.

Tribulus Terrestris Stimulates the Hypothalamic pituitary functions to adequately drive testosterone secretion as well increases testicular steroidogenesis without any negative effect on hypothalamic pituitary Gonadal axis.

Improves primary and secondary sex function and reproductive capacity along with improved stamina and body endurance. The Chemical Pharmaceutical Institute in Sofia, Bulgaria conducted Clinical studies on Tribulus which showed improved reproductive functions, including increased sperm production and Testosterone level in men. No adverse effects to the central nervous or cardiovascular systems were noted in any of the clinical studies, no toxicity and no deviations in blood count occurred. No known negative effects presently exist when Tribulus is used as sexual revitalizer.
